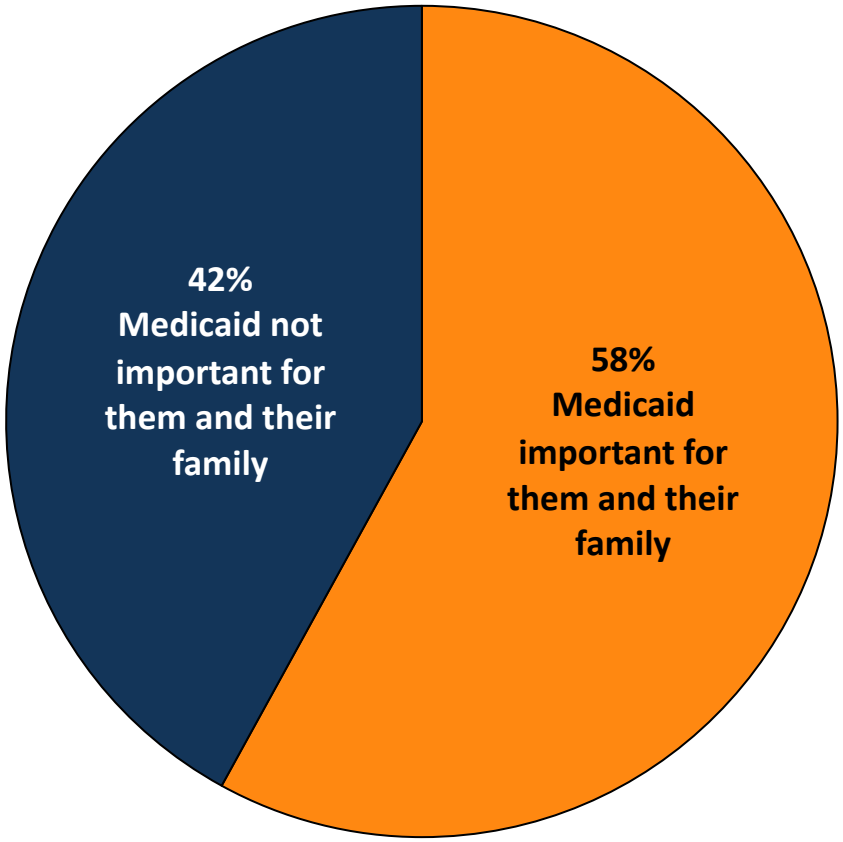

Figure 1

Nearly 6 in 10 Americans say Medicaid is important for them and their family.

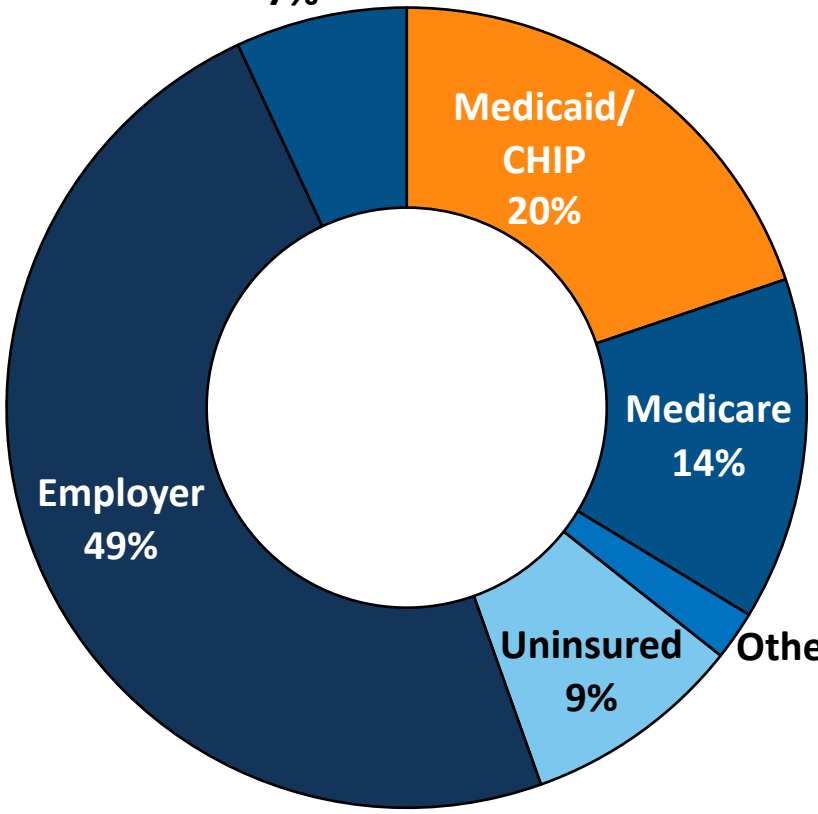

SOURCE: Kaiser Family Foundation Health Tracking Poll (conducted May 16-22, 2017)

THE HENRY J. KAISER FAMILY FOUNDATION

Figure 2

Medicaid and CHIP cover 20% of Americans, including:

Total Population:
318.9 million

3 in 5 nursing home residents, primarily seniors

2 in 5 people with disabilities

2 in 5 children

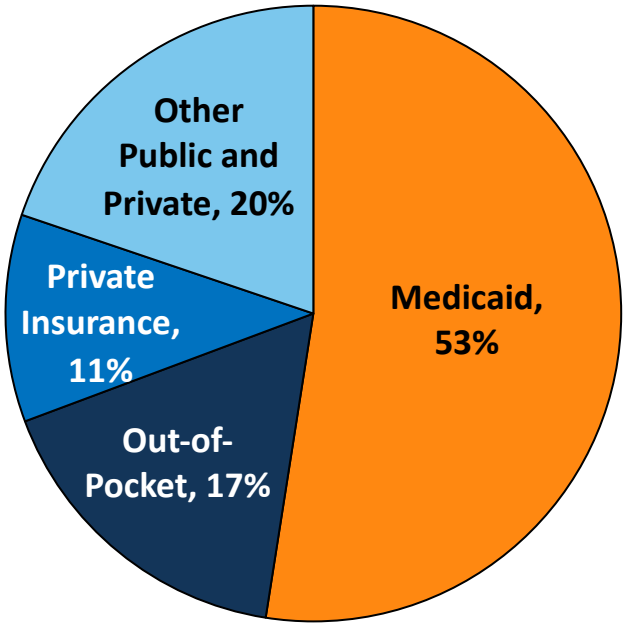

1 in 2 low-income individuals

SOURCE: KFF analysis of 2015 data from the 2016 ASEC Supplement to the CPS. For additional population-specific data sources, see KFF Medicaid State Fact Sheets: http://www.kff.org/interactive/medicaid-state-fact-sheets/

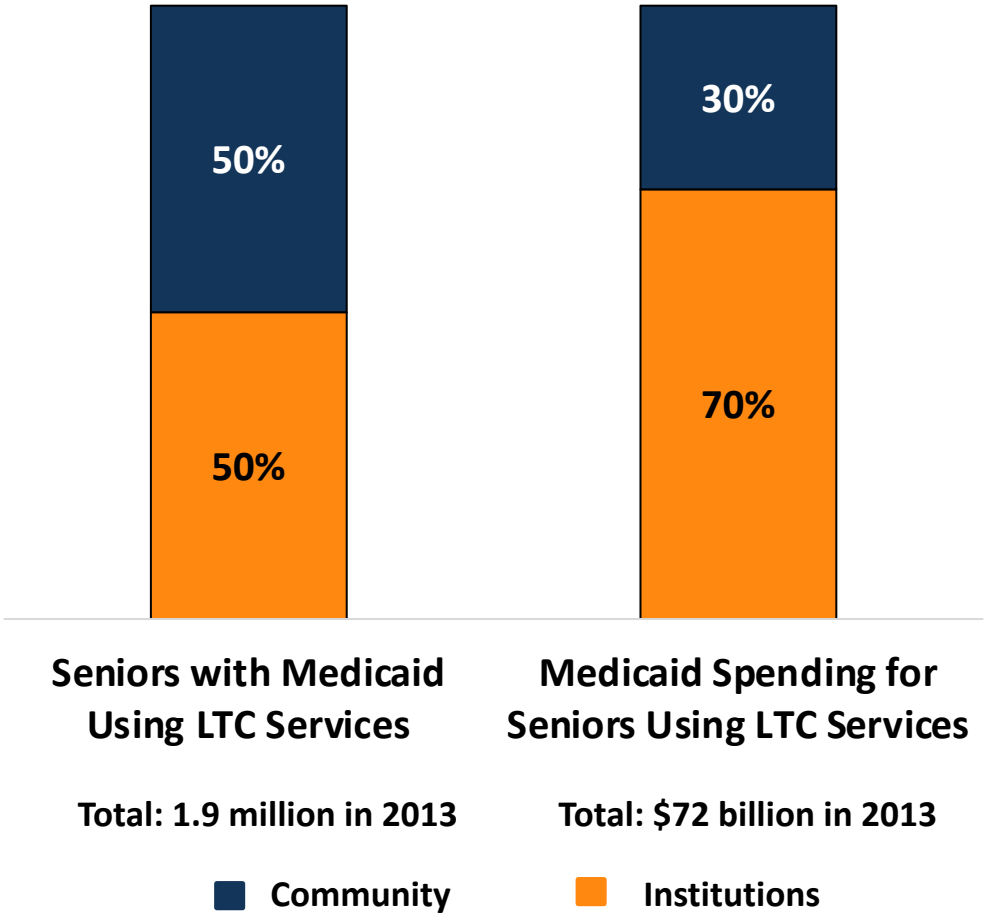

Figure 3

Medicaid funds over half of all long-term care (LTC) services.

Total LTC Spending: $331.2 billion in 2015

Seniors use Medicaid long-term care services in nursing homes and the community.

SOURCES: *LTC Services Spending:* KFF estimates based on 2015 National Health Expenditure Accounts data from CMS, Office of the Actuary. *Senior Enrollment and Spending:* KFF estimates based on analysis of data from FY 2013 MSIS and Urban Institute estimates from CMS-64 reports. Because CO and RI data were unavailable in 2013, used data from earlier years aligned to 2013 CMS-64. Individuals who used both institutional and community-based services in the same year are classified as using institutional services.

Figure 4

*"**Medicaid** allowed me to have the **same care as everybody else**, in the same hospital and in this nursing home…there's no discrimination."*

– Penny (Braintree, MA)

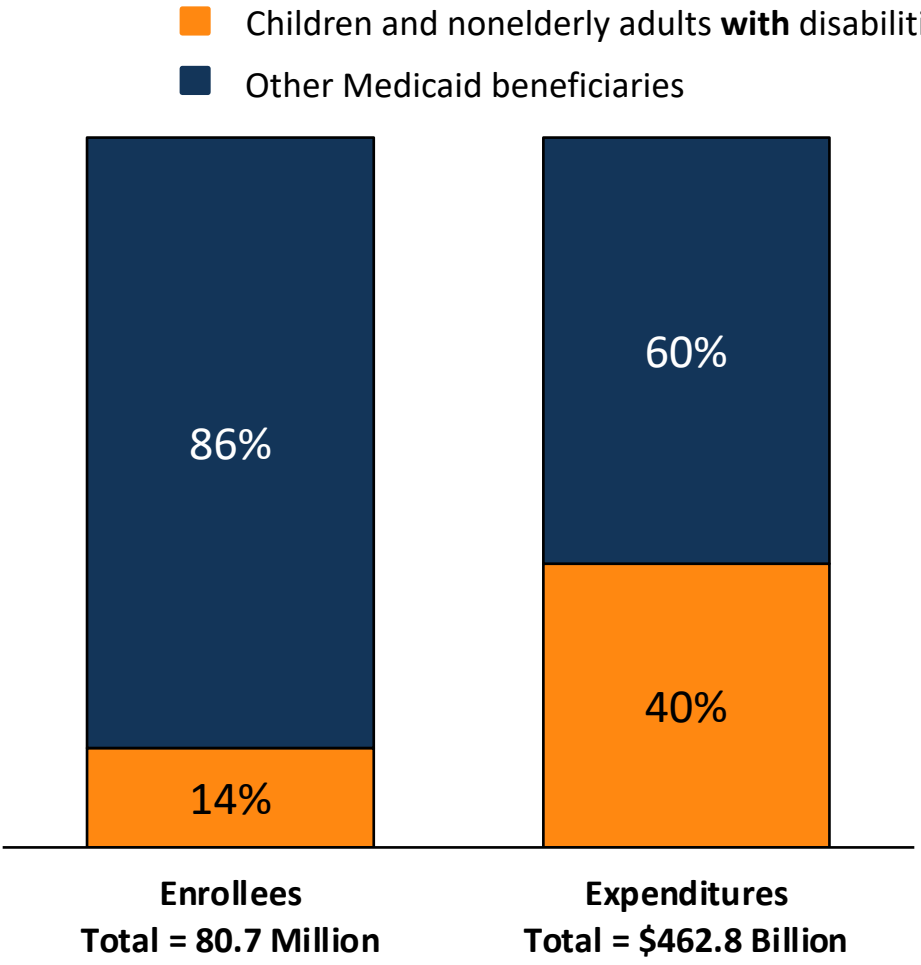

*"My mom had Medicare at the time of her stroke but it did not cover long-term care. To us, **Medicaid means being able to live with dignity**, in the community, with friends and family."*

– Mary (Richmond, VA)

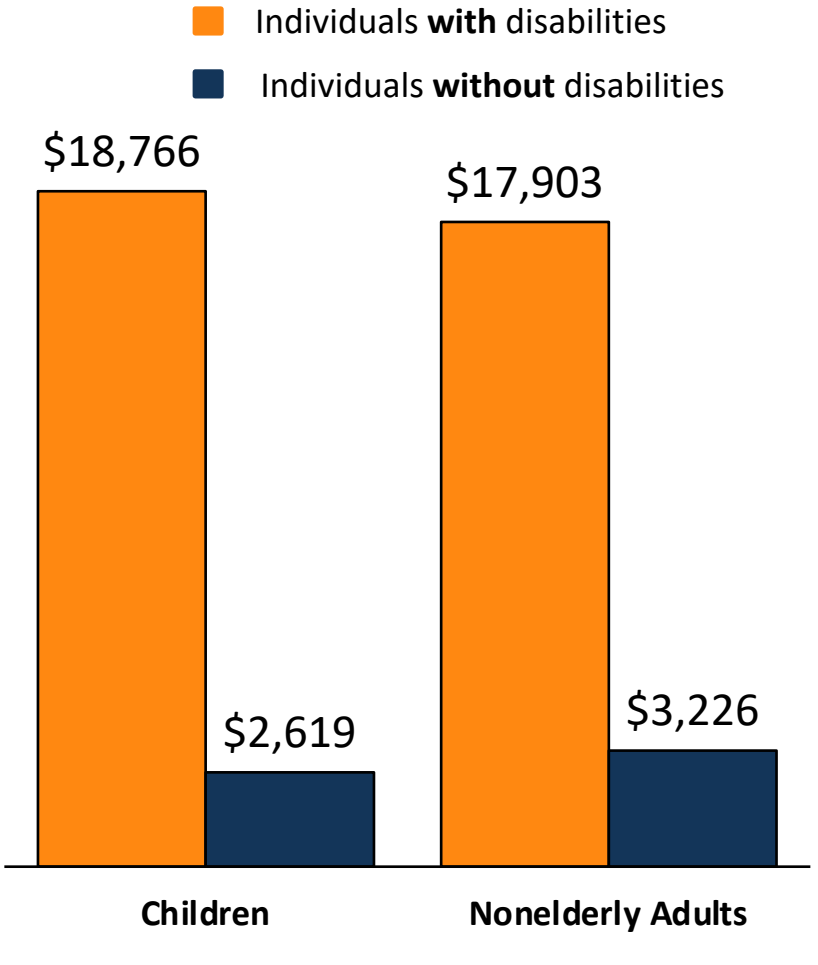

THE HENRY J. KAISER FAMILY FOUNDATION

Figure 5

Nonelderly adults and children with disabilities represent 14% of Medicaid enrollment but 40% of spending.

Medicaid spending per enrollee is far higher for children and nonelderly adults with disabilities than for those without.

SOURCES: *Enrollment and spending:* KFF estimates based on analysis of data from the FFY 2014 Medicaid Statistical Information System (MSIS) and CMS-64 reports. Because FFY 2014 data was missing some or all quarters for some states, we adjusted the data using secondary data to represent a full fiscal year of enrollment. *Spending per enrollee:* KFF estimates based on analysis from FFY 2014 MSIS and Urban Institute estimates from CMS-64 reports. This data reflects only states with 4 quarters of MSIS data.

Figure 6

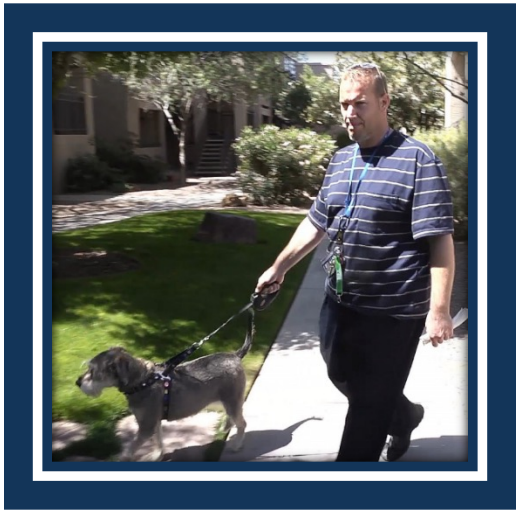

Gabriel, age 4, Louisiana

Gabriel was born prematurely at 27 weeks and has chronic lung disease and other significant health needs. Medicaid provides nursing, therapies, and other services to keep him healthy and safe at home. Gabriel's mother Jessica said she believes that **Medicaid helps Gabriel to "reach his maximum potential"** and maintain his quality of life.

Bill, age 42, Arizona

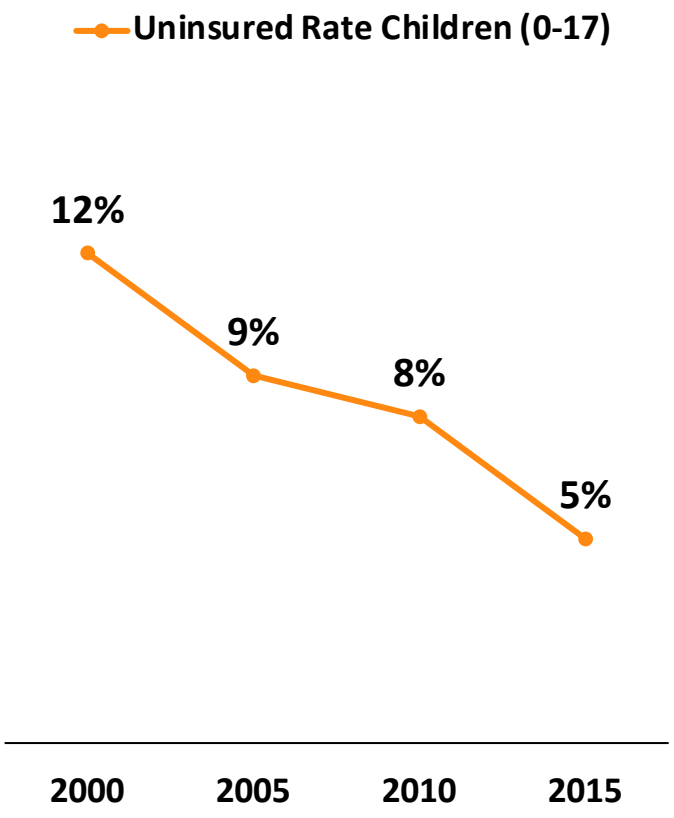

Bill was going to school and working as a nurse when he had his first mental break at age 27. While hospitalized, he was diagnosed with bipolar disorder and found out that he qualified for Medicaid. Medicaid covers the day treatment program that he attends for 30 hours a week, along with medication and doctor visits, to manage his condition. Bill says that **Medicaid means he has "been given a second chance."**

Figure 7

The uninsured rate for children is at a record low.

Children with Medicaid/CHIP have greater access to care than uninsured children and comparable access to children with ESI.

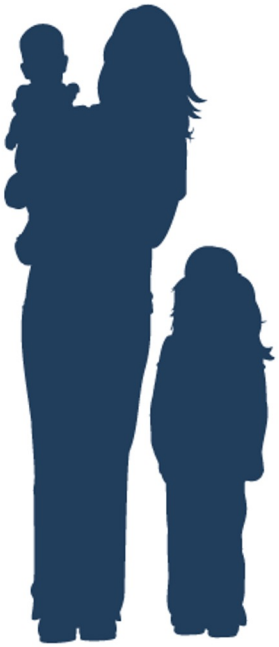

*Difference from ESI is statistically significant (p<.05)

NOTES: Access measures reflect experience in past 12 months. Respondents who said usual source of care was the emergency room are not counted as having a usual source of care. Employer-Sponsored Insurance includes other private.

SOURCES: Uninsured rate: Early release estimates from the 2016 National Health Interview Survey (NHIS), May 2017. Access measures: KFF analysis of 2015 National Health Insurance Survey data.

Figure 8

*"Now I have a doctor for my son through Medicaid…It's been very helpful knowing that if something happens with him I can just **go to a doctor without having to be scared** that it's **going to put me into debt**."*

– Marissa (Denver, CO)

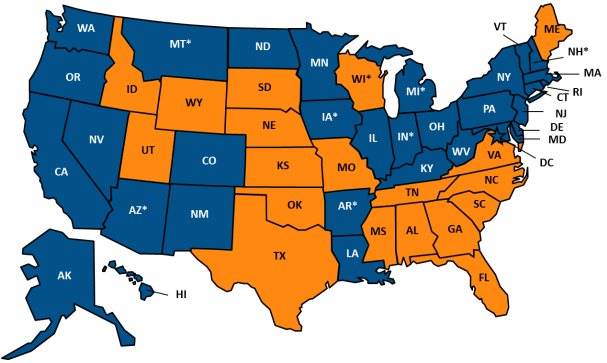

*"My children currently have **Medicaid**….should they need to go to the dentist, they have the cleaning, as needed—their yearly check-up. My son needed glasses, so that was being taken care of. And their **injections, their vaccinations, for school**. It's a blessing."*

– Maria (Blanco, TX)

Figure 9

The Medicaid expansion has led to improvements in coverage, access to and affordability of care, and employment.

Expanded (32 States including DC)

Did Not Expand (19 States)

84% of the public believe expansion states should continue to receive enhanced federal expansion funds

Reduction in the Number of Uninsured

Increased Access to Care and Service Utilization

Improved Affordability of Care

Supports Employment and Financial Security

Figure 10

"My husband lost his job, so the insurance that we had wasn't going to continue…Having healthcare through Medicaid has been a huge blessing for me and my family…Medicaid has allowed us to become small business owners (with the plan to employ others from the community when we reach that point)."

– Angela, Columbus, OH

*"**Medicaid coverage in Arkansas was expanded** [in 2014] and **I was then covered**…It was such a relief…Now, **I'm just like anyone else who works and has insurance**."*

– Kim, Little Rock, AR

"Just considering my circumstances right now. I cannot imagine all the doctor bills in the last couple months, the meds, and testing I have to do, not having [Medicaid] coverage. I have no idea how I would have pulled that off, or where I would have gone to get help."

– J.T., Harrisburg, PA

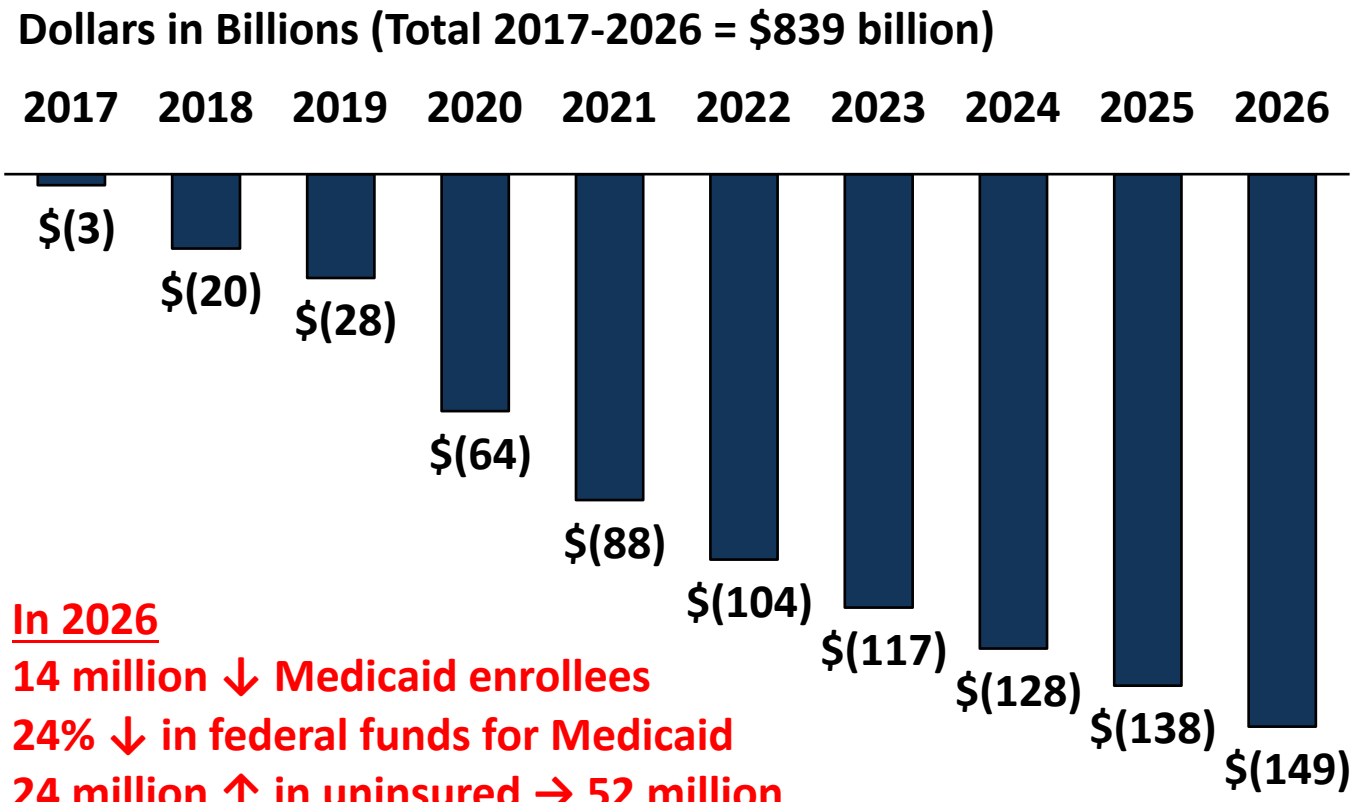

*"I think the good thing **with [Medicaid]** is I know **the visit's going to be covered**. I don't have to worry about how much am I going to have to shell out at the end of the visit and the guess work around how much it will be."*

– Shaeida, Baltimore, MD

Figure 11

CBO estimates federal savings from the AHCA Medicaid provisions.

In 2026

14 million ↓ Medicaid enrollees

24% ↓ in federal funds for Medicaid

24 million ↑ in uninsured → 52 million uninsured

But…

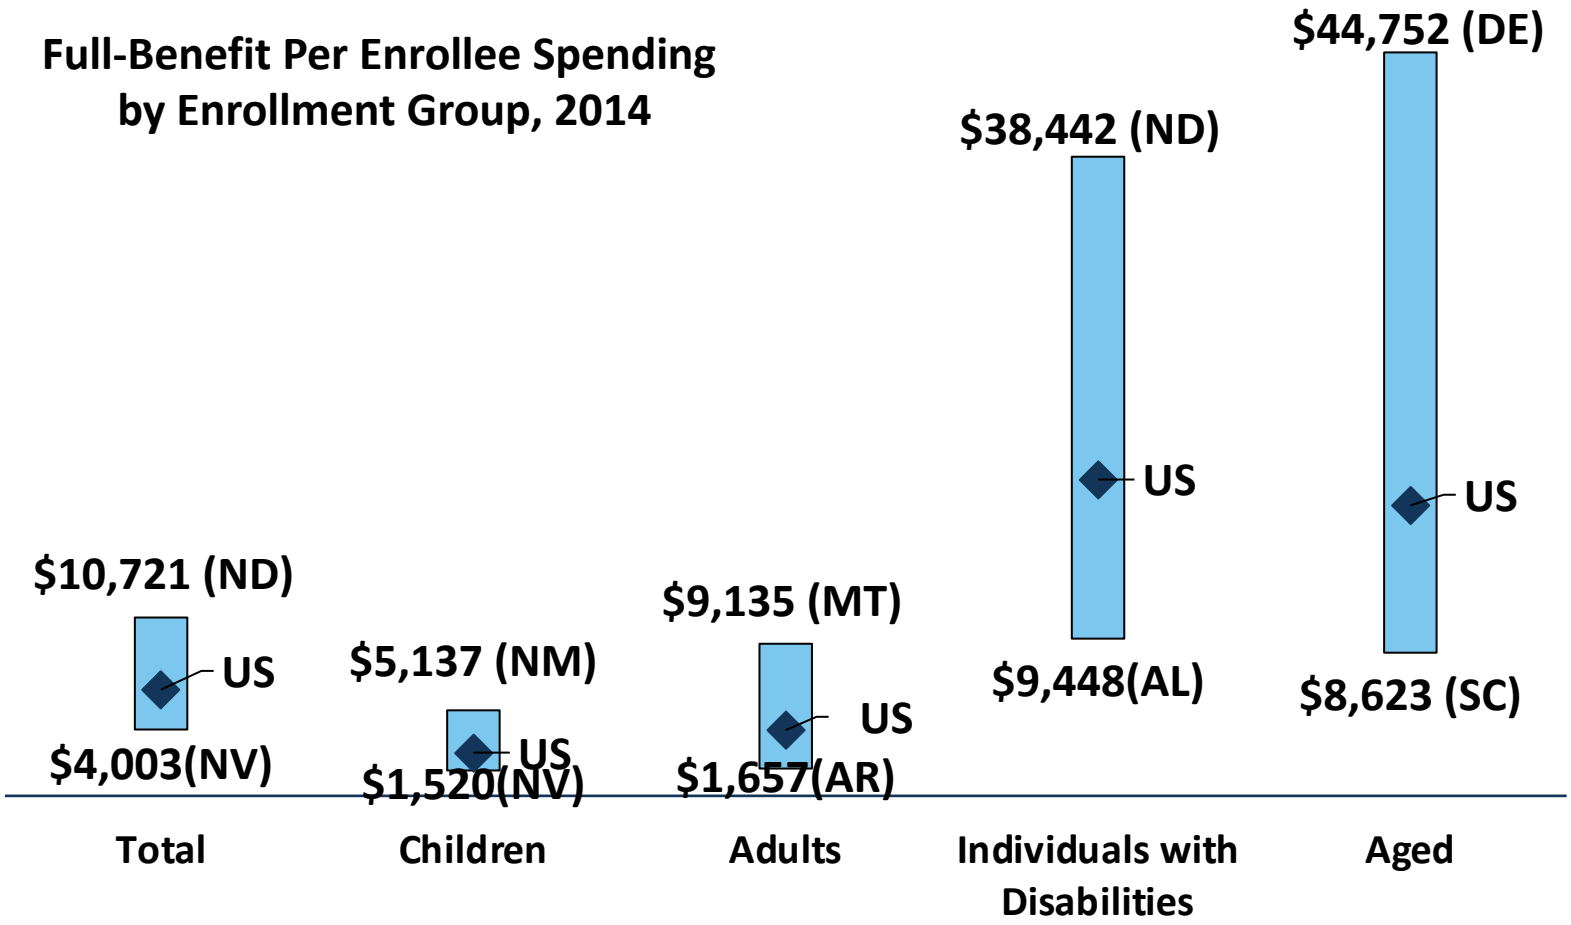

71% of Americans think Medicaid should continue as it is today

SOURCES: CBO Estimate of H.R. 1628, the American Health Care Act, incorporating manager's amendments 4, 5, 24, and 25. March 23, 2017. Kaiser Family Foundation Health Tracking Poll (conducted May 16-22, 2017).

THE HENRY J. KAISER FAMILY FOUNDATION

Figure 12

In FY 2014, state full-benefit per enrollee spending by enrollment group varied significantly, especially for high-cost populations

NOTE: Spending per capita was calculated only for Medicaid enrollees with unrestricted benefits or those enrolled in an alternative package of benchmark equivalent coverage. Outliers are included in the figure, but not marked as outliers.
SOURCE: KFF estimates based on analysis of data from the FFY 2014 Medicaid Statistical Information System (MSIS) and Urban Institute estimates from CMS-64 reports. Because FFY 2014 data was missing some or all quarters for some states, we adjusted the data using secondary data to represent a full fiscal year of enrollment.
