Record Renewable Energy Growth

A 2024 Snapshot of U.S. Renewable Energy Production

2024 Renewable Energy Highlights

- Biofuels, wind and solar each set production records in 2024
- Biofuels reached 1.4 million barrels/day, up 6% from 2023
- Solar output jumped 25% and wind rose 8% as new generators came online
- Hydropower and nuclear production peaked decades ago; geothermal fell slightly
